

VACANCY

Job Title: Plant Leader

Department: Main Production Hawick

Vacancy Code: BM04

Requirement Overview

Reporting to the Production Manager, this position involves the leading of Shift Teams in the running of extrusion machines, completing quality checks and any other tasking associated with the meeting of our production requirements as directed.

This requirement is to satisfy the production objectives of our Main Production Department. The Department and the Plant Leader is tasked with the volume preparation and production of products to satisfy customer requirements and then to drive continuous improvement by using manufacturing methodologies, whilst maintaining KPI targets, and high standards of safety and quality and team development.

Role and Responsibilities

- 1) The successful applicant must be able to demonstrate excellent people management and leadership skills together with the ability to plan and prioritise their own work as well as that of other people.
 - 2) The person we appoint will have proven experience in managing shifts and be able to demonstrate excellent communication skills in order to direct their team in the smooth running of the production process.
 - 3) The successful candidate must be able to meet targets and shipping deadlines whilst ensuring that all products are manufactured to the correct specifications and that all processes and procedures comply the Company's Health and Safety Policy.
 - 4) Applicants should have experience in extrusion where optimising machine performance and minimising downtime are key performance measurements. Knowledge and application of lean manufacturing techniques is highly desirable.
 - 5) The successful candidate will report to the Production Manager and will work on 12-hour shifts on rotating continental shift pattern.
 - 6) Ensuring safe and high standard of packaging of all customer products.
- 1) Pro-actively helping with solutions to improve production.
 - 2) Liaising with the Production Manager and other Plant Leaders regarding any outstanding tasking within production and actively participating in their resolution.
 - 3) Plant Leaders and their teams, are required to ensure that the production area and all pertaining to it is kept clean and hazard free
