

# CONNECT TERMINAL

A 3 IN 1 INDOOR TERMINATION MASTERPIECE.

Unlike any other, the Connect Terminal allows for splicing of 2 fibres, fitting 1 x SC simplex adaptor and simultaneously houses two ports for coaxial cables, LAN cables or both. It's a 3 in 1 revelation.

Whilst fitting onto any 4x4 surface wall box, this termination product effortlessly combines fibre signal distribution with internet and satellite TV services. It's a household dream.

**Ideal opportunity on the fascia for ISP branding**

## Unique Features

The removeable fascia is easily secured in 4 locations with clips that are released with a standard screw driver.

The fascia is tamper resistant.

Bare fibre is managed to a 20mm bend radius providing network integrity within a small footprint.

Made from fire retardant ABS, the clean aesthetics of the Connect Terminal will suit any modern home.

The low profile on the wall and angle of the cable exit allows for the Connect Terminal to sit easily behind furniture and pose no obstacle when cleaning.
