**uPVC Connector Sleeves:****Product Description**

---

Emtelle Connector Sleeves are manufactured from a solid wall uPVC duct and provide the means to connect two spigot ends of duct by sliding over one spigot and pulling back to cover the other spigot.

This method of connection is desirable in circumstances of repair, and also where a close fit between spigot ends are required. In addition, it is also used where the construction of the duct system is undertaken from 2 directions and meets at a certain point e.g. – road crossings: in this instance space limitations would not allow for the use of a double socket connector.

**Application**

---

The application areas covered within this document are: Telecommunications, Power and General Purpose.

**Material & Technical data**

---

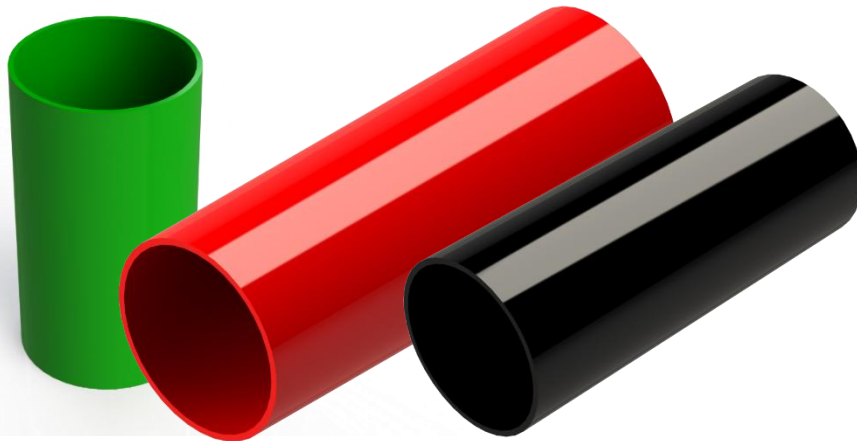

Raw Materials are uPVC resin and other additives suitable for the required properties of the finished product.

**Colours**

---

Standard colours are **Black, Red, Green & Purple**

*Other colours available upon request.*
