TOGETHER EVERYTHING CONNECTS

MICROLOOP ENCLOSURES

Multifunctional FTTx Closures

Discover the FTTx Microloop Enclosures, where robustness and multifunctionality ensure reliable FTTx deployment. This range includes the M4 and M8 models, each carefully designed to meet the evolving needs of distribution networks. They ensure continuous connectivity and efficient operation, ideal for modern telecommunications infrastructure.

Upgrade Your Network Today!
Together, Everything Connects

CLOSURE CONNECTIVITY

We are proud to present a comprehensive M4 and M8 MicroLoop enclosures, designed for diverse network needs. They are ideal for compact small-scale applications and robust large-scale deployments. The M4 and M8 can be installed both above head and below ground.

COST-EFFECTIVE DEPLOYMENT

Reduce implementation costs, facilitating either 4 or 8 customer drops from a single node, maximising efficiency and minimising infrastructure expenses.

VERSATILE INSTALLATION OPTIONS

The versatility of these closures, being installable both above head and below ground, ensures comprehensive protection and flexibility in various environments, enhancing operational efficiency and adaptability to diverse installation requirements.

ENHANCED SECURITY

Prioritise network security with features like external padlock staples and wall mounting points, ensuring protection against unauthorised access and tampering.

RELIABLE PERFORMANCE

Trust in the reliability and durability of the MicroLoop Enclosures, designed to withstand harsh environmental conditions and maintain smooth connectivity.

KEY FEATURES

- Network cable entry ports with strength member & aramid fixation.
- Removable pole mount brackets for direct transmission pole mounting.
- Available with 4 or 8 Drop cable exit ports up to 6mm with adapter plate for SC simplex or LC duplex adapters.
- Multiple configurations for splice trays with a PLC splitter bay.
- Can be installed both above head and below ground.
