EibreFlow Customer Termination Unit

Product Description

The CO-WMFE-FTTX is a wall mounted fibre management system for any broadband network architecture which uses optical fibre to provide all or part of the local loop used for last mile telecommunications.

The 1 door lift off opening provides the installer to access all of the internal components. The door is lockable using a single screw

Design Features

- Compact and modular wall-mountable customer termination box.
- 8 Fibre splices can be managed in single circuits using fibre organizing systems.
- Solution Cable coming into the enclosure are hidden by protective tubing which is secured to the external wall.
- Hree fixing holes located on the box so it can be secured tightly to the external wall.

Application Notes

Storage

The Customer Termination Unit can accommodate up to 50m of fibre with an O.D of 1.1mm, which can be coiled up inside the closure.

As well as the coiled fibre the CTU is compatible with the QWKlink and QWKconnect pre-connectorized fibre for fast installation.
